Free Fonts Used:

<http://www.fontsquirrel.com/fonts/bebas-neue>

<http://www.fontsquirrel.com/fonts/Caviar-Dreams>

Logo File is included in folder "Vector Artwork"

The Icons used in this project are courtesy of <http://salleedesign.com/>

MimiGlyphs.

<http://salleedesign.com/resources/mimi-glyphs/>

What's in it: 80 icons, 16 by 16px. Photoshop file, CSH file & PNG.

Free for personal and commercial use.

I have used a few of these icons alongside Illustrator/InDesign, some are also available in the artwork folder but if you need more icons I highly recommend you check out the website above, there are many more available!

Page Layers:

As stated above...check out your layers panel for organized layers!

This may be redundant but I spent so much time labelling those damn things...haha.

Colour Swatch

This template makes use of one colour and good ol' black and white.

The yellow is used throughout the document, changing the colour swatch will adjust the entire layout accordingly to any colour you choose.

In Conclusion

Do whatever you want to this, improve it, reshape it, anything goes.
